Organization of production for the extraction and processing of bentonite clays, construction of a clay powder factory

Branch	Industry
Project name	Organization of production for the extraction and processing of bentonite clays, construction of a clay powder factory
Brief description and purpose of the project	Organization of production and enrichment of bentonite clays. Construction of a clay powder factory. The Ostrozhanskoye bentonite clay deposit is located 35 km from the district center of Lelchitsa. The depth of bentonite clay is 15-20 meters, in addition, in the upper part of the overburden at a depth of 4-10 meters there are deposits of ceramic clays, which themselves can be used for the production of ceramic materials. The reserves are estimated at 12.3 million tons. It is a promising raw material base for molding materials for foundry production, production of coatings in the form of pastes, powders or stabilizing paints, clay powders for drilling fluids and, in the future, for pelletizing iron ore concentrates, refining and purification of oils and petroleum products, as well as as insulation of radioactive waste disposal sites and wastewater treatment. Bentonite clay has found wide application in the preparation of a variety of animal feeds, bentonite is used for agricultural purposes during the work on soil reclamation, bentonic clay has also found application as a material used in the manufacture of fillers for cat toilets.
Project status	Investment proposal
Main sales markets	Republic of Belarus, foreign countries
Investor's participation	Concession
Offers to the investor	Creation of a new production facility
Ways of the use of investments	Design and construction and installation works, purchase and installation of equipment, formation of working capital
Location of the project	v. Ostrozhanka, Lelchitsky district, Gomel region
Availability of a business plan, feasibility study	No
Offer prepared (contacts)	Lelchitsy District Executive Committee +375 2356 2 28 96; +375 2356 2 29 08, lel-econom@lelchitsy.gov.by

Creation of an enterprise for the processing of wild mushrooms and berries

Branch	Industry
Project name	Creation of an enterprise for processing wild-growing mushrooms and berries
Brief description and purpose of the project	In order to implement the project, it is planned to use the following methods of processing mushrooms and berries: deep freezing, drying, canning
Project status	Investment proposal

Main sales markets	Republic of Belarus, foreign countries
Investor's participation	Creation of production
Offers to the investor	Creation of production
Ways of the use of investments	Purchase of the necessary equipment
Location of the project	Gomel region, Lelchitsky district
Availability of a business plan, feasibility study	No
Offer prepared (contacts)	Lelchitsy District Executive Committee +375 2356 2 28 96; +375 2356 2 29 08, lel-econom@lelchitsy.gov.by

Construction of a processing plant for glass and molding sands

Branch	Industry
Project name	Construction of a processing plant for glass and molding sands
Brief description and purpose of the project	The enrichment of sands will expand the sales markets for mined sands, replace imported molding and glass sands with domestic ones, used not only in the glass industry, but also in construction. On the territory of the district there is a deposit of molding sands Ubortskaya Rudnya (1.95 km southeast of the center of the village of Ubortskaya Rudnya and 25 km northeast of the center of the town of Lelchitsy). The field requires additional exploration work. The preliminary estimated reserves amount to 34.4 million tons.
Project status	Investment proposal
Main sales markets	Republic of Belarus, foreign countries
Investor's participation	Concession
Offers to the investor	Creation of a new enterprise (production)
Ways of the use of investments	Purchase of the necessary equipment
Location of the project	village Ubortskaya Rudnya, Lelchitsky district, Gomel region
Availability of a business plan, feasibility study	No
Offer prepared (contacts)	Lelchitsy District Executive Committee +375 2356 2 28 96; +375 2356 2 29 08, lel-econom@lelchitsy.gov.by

Construction of a sports and recreation complex in the town of Lelchitsy

Branch	Culture, service
Project name	Construction of a sports and recreation complex in the town of Lelchitsy
Brief description and purpose of the project	Development and improvement of physical education of the population, holding mass sports events.

	The project of the sports complex includes: a swimming pool, a game sports hall, a specialized hall for individual sports and administrative and household premises.
Project status	Investment proposal
Main sales markets	Residents and guests of the town of Lelchitsy
Investor's participation	Direct investment, joint venture
Offers to the investor	Any forms of cooperation
Ways of the use of investments	Construction of a sports and recreation complex
Location of the project	Gomel region, Lelchitsy
Availability of a business plan, feasibility study	No
Offer prepared (contacts)	Lelchitsy District Executive Committee +375 2356 2 28 96; +375 2356 2 29 08, lel-econom@lelchitsy.gov.by

Creation of a modern production of granular fertilizers with a prolonged effect on the basis of peat and sapropel

Branch	Chemical production
Project name	Creation of a modern production of granular fertilizers with a prolonged effect on the basis of peat and sapropel
Brief description and purpose of the project	Fertilizer allows to reduce the loss of plant nutrients from leaching them out of the root layer of the soil, which increases the coefficient of their use. Complex granular fertilizers are planned to be produced in five different ratios of nutrients - nitrogen, phosphorus and potassium. The fertilizer is import substituting, since this kind of organomineral fertilizers are imported from Russia, Ukraine, Australia, Vietnam)
Project status	Investment proposal
Main sales markets	The Republic of Belarus, foreign countries
Investor's participation	Creation of production
Offers to the investor	Creation of production
Ways of the use of investments	Purchase of necessary equipment, its installation and commissioning.
Location of the project	Lelchitsky district
Availability of a business plan, feasibility study	Not available
Offer prepared (contacts)	Lelchitsy District Executive Committee +375 2356 2 28 96; +375 2356 2 29 08, lel-econom@lelchitsy.gov.by

Creation of modern production of fuel pellets from peat

Branch	Energy
Project name	Creation of modern production of fuel pellets from peat
Brief description and purpose of the project	Peat is a promising alternative energy source. As a result of peat processing, pellets are obtained, which are high-quality biofuels that are not inferior in caloric content to individual brands of coal and surpass brown coal. The economic advantages of peat pellets are: low cost, unlimited and affordable raw materials, high density of granules, which helps to reduce the storage area and the efficiency of transportation, peat ash can be used as fertilizer.
Project status	Investment proposal
Main sales markets	The Republic of Belarus, foreign countries
Investor's participation	Creation of production
Offers to the investor	Creation of production
Ways of the use of investments	Purchase of necessary equipment, its installation and commissioning.
Location of the project	Lelchitskiy district
Availability of a business plan, feasibility study	Not available
Offer prepared (contacts)	Lelchitsy District Executive Committee +375 2356 2 28 96; +375 2356 2 29 08, lel-econom@lelchitsy.gov.by

Creation of modern production of elite soybean seeds and hybrid sunflower seeds

Branch	Agricultural industry
Project name	Creation of modern production of elite soybean seeds and hybrid sunflower seeds
Brief description and purpose of the project	The implementation of the project will ensure the full demand of the region's farms for these seeds for the production of feed protein, import substitution of soybean and sunflower meal currently imported into the region from abroad.
Project status	Investment proposal
Main sales markets	The Republic of Belarus, foreign countries
Investor's participation	Creation of production
Offers to the investor	Creation of production
Ways of the use of investments	Purchase of the necessary equipment, its installation and commissioning.
Location of the project	Lelchitsky district
Availability of a business plan, feasibility study	Not available

Offer prepared (contacts)	Lelchitsy District Executive Committee +375 2356 2 28 96; +375 2356 2 29 08, lel-econom@lelchitsy.gov.by

Creation of an enterprise for the extraction and bottling of natural ultra-fresh and children's drinking water of the highest category

Branch	Industry
Project name	Creation of an enterprise for the extraction and bottling of natural natural ultra-fresh and children's drinking water of the highest category
Brief description and purpose of the project	On the territory of the Lelchitsky district there are large-scale deposits of ultra-fresh groundwater, which are a promising natural resource for the organization of innovative import-substituting and export-oriented production of bottled drinking water of unique chemical composition. Ultra-fresh and fresh drinking groundwater can be used: for the preparation of baby food; for medical purposes; for health improvement; for dietary nutrition; sanatorium treatment.
Project status	Investment proposal
Main sales markets	The Republic of Belarus, foreign countries
Investor's participation	Creation of a new production facility
Offers to the investor	Creation of a new production facility
Ways of the use of investments	Design, construction and installation work, purchase of equipment
Location of the project	Gomel region, Lelchitsky district, village Dubrovki
Availability of a business plan, feasibility study	Not available
Offer prepared (contacts)	Lelchitsy District Executive Committee +375 2356 2 28 96; +375 2356 2 29 08, lel-econom@lelchitsy.gov.by

Creation of a production facility for the extraction and processing of facing stone

Branch	Industry
Project name	Creation of a production facility for the extraction and processing of facing stone
Brief description and purpose of the project	The deposit is located 0.5 km south of the village of Glushkovichi. The depth of occurrence ranges from 1.4 m to 21.8 m. The minerals are crystalline rocks represented by migmatites of granite and granodiorite composition, to a lesser extent, migmatites of diorite composition and amphibolites. There are four zones in the field: - weathering crust with a capacity from 3.0 m to 23.4 m; - a zone of weathered rocks with a thickness from 0.6 m to 20.9 m;

	- zone of rocks affected by weathering with a thickness from 0.4 m to 10.1 m; - an area of unchanged rocks with an uncovered thickness of up to 67.4 m.
Project status	Investment proposal
Main sales markets	The Republic of Belarus, foreign countries
Investor's participation	Creation of a joint venture
Offers to the investor	Creation of a joint venture
Ways of the use of investments	Construction, purchase and installation of technological equipment, production preparation
Location of the project	Gomel region, Lelchitsky district, agro-town of Glushkovichi
Availability of a business plan, feasibility study	Not available
Offer prepared (contacts)	Lelchitsy District Executive Committee +375 2356 2 28 96; +375 2356 2 29 08, lel-econom@lelchitsy.gov.by

Investment proposal for the creation of a new production "Garden of hazelnuts"

Branch	Agricultural industry
Project name	Investment proposal for the creation of a new production "Garden of hazelnuts"
Brief description and purpose of the project	The garden is like real estate. The industrial "Hazelnut Garden" is an agricultural land plot in permanent indefinite use, with a built base for storing and servicing equipment, an electric substation, a water intake station, and an irrigation system. From an economic point of view, hazelnuts are an import–substituting product for the Republic of Belarus. In addition, it is a very tasty and extremely healthy nut with large, sweet kernels, which contain truly unique substances and trace elements necessary for the human body. hybrid sunflower seeds. Scope of application: hazelnuts are widely used in the baking and confectionery industry (nuts are used as a whole, crushed or ground); for sale in the wholesale and retail network; walnut shells can be used in furniture production (for the manufacture of durable panels for cabinets, tables and other pieces of furniture); fallen walnut leaves can be used as composting and mulch.
Project status	Investment proposal
Main sales markets	The Republic of Belarus, foreign countries
Investor's participation	Creation of a joint production
Offers to the investor	Creation of a joint production
Ways of the use of investments	Purchase of machinery, planting material, site preparation
Location of the project	Gomel region, Lelchitsky district

Availability of a business plan, feasibility study	Not available
Offer prepared (contacts)	Lelchitsy District Executive Committee +375 2356 2 28 96; +375 2356 2 29 08, lel-econom@lelchitsy.gov.by

Creation of a medical and tourist complex based on a unique source of ultra-fresh groundwater

Branch	Section Q «Health and social services»
Project name	Creation of a medical and tourist complex based on a unique source of ultra-fresh groundwater
Brief description and purpose of the project	The project involves the creation of a medical and tourist complex based on a unique source of ultra-fresh groundwater with a room stock of 200 places. Organization of accommodation and meals, a wide range of wellness services (physiotherapy and cosmetic procedures, cryotherapy, water, heat and mud baths, mineral water, etc.), swimming pool, sauna and SPA center, gym, children's playroom, bicycle rental, other sports equipment, etc.
Project status	Investment proposal
Main sales markets	Residents and guests of the town of Lelchitsy
Investor's participation	Public-private partnership
Offers to the investor	Public-private partnership
Ways of the use of investments	Design – Financing – Construction – Maintenance – Operation
Location of the project	Gomel region, Lelchitsky district
Availability of a business plan, feasibility study	Not available
Offer prepared (contacts)	Lelchitsy District Executive Committee +375 2356 2 28 96; +375 2356 2 29 08, lel-econom@lelchitsy.gov.by
